Installing Software Using Microsoft Software Center

What is Software Center?

Microsoft Software Center is an application that allows you to select available software to download to your computer on-demand.

Please note: laptops need to be connected to wired/wireless network in order to use the Software Center.

Installing software

Below are instructions to help you install software automatically to your computer.

Launch Software Center

1. Go to Start -> All Programs

2. Click Microsoft System Center -> Configuration Manager -> Software Center

Install Software

After Software Center is launched, you will see a list of available applications. Click on the application to highlight it and then click the "**Install**" button in the bottom right corner to install the software.
